

Vivek Kumar Jain

MERN Stack Developer

☎ 8002279424 ✉ vivekjain.patna@gmail.com  [Linkedin](#)  [GitHub](#)

Summary

Full Stack Developer specializing in the MERN stack, with experience in building scalable, user-centric web applications. Skilled in developing secure backend systems, responsive frontends, and efficient data-driven solutions. Possess a strong command of Data Structures and Algorithms (DSA) with consistent problem-solving practice. Passionate about exploring AI-driven solutions and writing clean, optimized code to transform complex ideas into impactful products.

Skills

Programming Languages: Java, JavaScript, C, Python, HTML, CSS, Tailwind CSS

FrameWorks: React.js, Express, Node.js

Libraries: React router, REST APIs, Axios, Mongoose, JWT, Bcrypt.js, Multer, CORS, Cloudinary

Databases: MongoDB, SQL

Core CS: Data Structures and Algorithm (Java) , Time/Space Complexity

Dev tools: Git, GitHub, Visual Studio Code, Postman

Education

B.Tech. Information Technology

Techno Main Salt Lake, Sector 5, Kolkata

Ongoing: 2023-2027

CGPA: 7.3 / 10

Projects

Nyay Ghar(Lawyer Management System) | *MERN Stack, AI Integration*

2026

- Developed a **full-stack legal management system** with role-based access for lawyers, clients, and clerks.
- Implemented **end-to-end case lifecycle management** including case creation, updates, and status tracking.
- Built **document automation** and integrated **AI-based legal research (Nyay AI)**.
- Built **automated notification system** for clients to track records such as cases and hearings in real-time.
- Designed secure backend APIs and optimized MongoDB queries ensuring **data protection, faster retrieval, and scalability**.
- Enabled **paperless legal workflows**, reducing manual effort and improving operational efficiency.

College Tracker | *MERN Stack, Framer Motion*

2025

- Developed a **full stack digital campus administration platform** to automate internal document approval processes.
- Enabled students to **track document status in real-time** across multiple roles such as HOD, clerk, and office.
- Implemented **digital Approve request functionality** for secure and authorized approvals.
- Allowed students to **download approved documents** after final authorization of their submitted requests.
- Built **automated notification system** to update users on application status.
- Designed a **centralized dashboard** for administrators to manage and monitor requests efficiently.

Home Ease - Service Marketplace | *MERN Stack, Tailwind CSS, Framer Motion*

2026

- Developed a **Full-Stack service platform** with RBAC for Admins, Providers, and Users.
- Engineered a **real-time booking system** for scheduling services and tracking status updates.
- Implemented a **Live Rating & Review system** enabling users to evaluate service quality and providers.
- Built **centralized dashboards** for category management, provider verification, and platform analytics.
- Implemented **secure REST APIs** and managed complex data relationships in MongoDB for data persistence.
- Designed an **interactive, responsive UI** using Framer Motion and Context API for state management.

Achievements

- Solved **120+ DSA problems** on LeetCode and 50+ on GFGs with a strong focus on Java and Data Structures.
